

Rev up sales with COM_Net2 V8 from Lexel Corporation!

We've done it again! Enhancements designed with you and your users in mind! COM_Net2 V8 delivers more information, increases system accessibility and eases user maintenance! We've spent a great deal of time with you, our customers, to really understand what YOU want added to the system.

We're pleased with our newest version and know you will be too!

Available immediately for Infor ERP XA Versions 6, 7.7 and 7.8

Enhancements include:

Executive Dashboard!

You want to know who, what, where, when, and for how long and we're going to track it for you! With V8, our new dashboard application will deliver usage statistics, graphically in a rolling 12 month display.

Gain direct access to:

- Number of Users
- Average Session Time
- Number of Orders
- Number of Order Lines
- Value of Orders

Statistics are displayed in three views: This Month, Last 12 Months and Monthly Average. Drill down to display yet another graph with even more detail including information by individual user, Summary Queries and Detail Queries. With V8, you have 24x7 access to business critical information

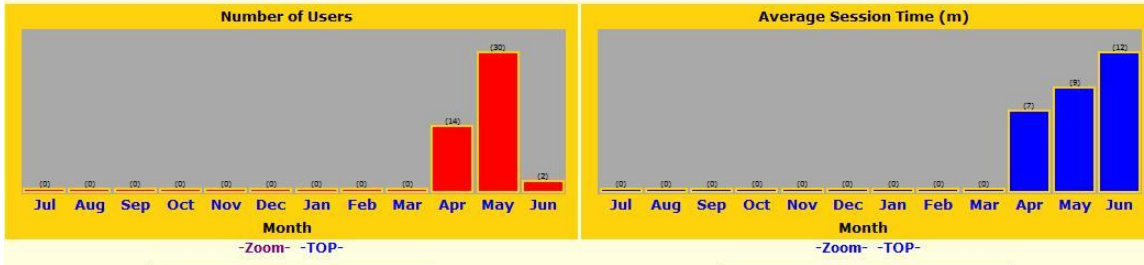

Quantify COM_Net2's benefits with Executive Dashboard!

****Please note Executive Dashboard displays statistics concerning COM_Net2 activity only****

COM_Net2 V8 Executive Dashboard

Date Range 7/2008-6/2009

	This Month	Last 12 Months	Monthly Average	
Number of Users	2	46	3.83	Graph
Average Session Time (m)	12.32	8.37	8.37	Graph
Number of Orders	0	0	0	Graph
Number of Order Lines	0	0	0	Graph
Value of Orders	0	0	0	Graph

Details For 6/2009

Visits	User (+)	Session Length (m)	Summary Queries	Detail Queries	# Orders	# Order Lines	Total Value	\$\$/visit
3	amapics	104.10	2.0	0.0	0.0	0.0	.00	.00
4	jenr	21.93	0.0	0.0	0.0	0.0	.00	.00
2	jmedina	16.45	8.0	1.0	0.0	0.0	.00	.00
7	marka	34.03	0.0	0.0	0.0	0.0	.00	.00

COM_Net2 Suggest

In certain areas, as you are typing, **COM_Net2 Suggest** will auto fill a field as well as populate a dropdown menu of options containing matching items. Save time and let COM_Net2 Suggest do the work for you through the predictive entry of searches! Find COM_Net2 Suggest in the following areas:

- Browse/Buy
- Advanced Catalog
- User Maintenance
- Catalog Item Maintenance

Speed Entry
Upload Order

Search By	<input style="width: 95%;" type="text" value="Item Number"/>	<input style="width: 90%;" type="text" value="GL10"/>	<input type="button" value="Go"/>
-----------	--	---	-----------------------------------

	ITEM NO.	DESCRIPTION	U/M	LIST	AVAIL	QUANTITY	
	GL10	BICYCLE GLASSES	EA		10,000	<input style="width: 30px;" type="text" value="1"/>	<input type="button" value="Add"/>
	G10	BICYCLE GLOVES	EA		95	<input style="width: 30px;" type="text" value="1"/>	<input type="button" value="Add"/>

List Pricing Display: In V8 we now give you the option to show customer pricing as well as list price...if you don't want it, simply elect not to show list price in the User Profile.

Speed Entry: Enhanced to automatically reposition the cursor to the Item Number Entry Field. This new functionality allows the user to enter an item and return automatically for subsequent items.

Shopping Cart: In V8 we now offer the option to view the shopping cart from "first to last" or "last to first". This new flexibility allows your users to sort, display and enter orders any way that's useful for them!

Insufficient Inventory: When a user attempts to order an item with insufficient inventory, substitute products are automatically displayed on the same page with the option to adjust the requested quantity, accept the item, cancel the item or select a substitute from a list...all on one page!

Kit Support: V8 gives users more options to support Kits! Three types of Kit support for you to choose from:

- No Kits
- Kits with No Quantity Displayed: component explosion with no quantity.
- Lowest Available Quantity Available: component explosion with no inventory.

Saved Carts: Suspended Orders have been revised and renamed. A new menu link to Saved Carts has been added and a new "Resume" feature has been added which deletes a saved cart and rebuilds a new cart!

Features & Options Update: V8 will display a thumbnail of an option and allows a user to access and review Features and Options in detail after an order has been closed.

Shipping Carrier Options: In V8, logic has been added to define, by user, specific carriers you want displayed during the checkout process. Choose from the list in XA and then create carrier groups that are all defined by users or groups of users.

Request Date: Displaying in Shopping Cart is now optional and defined by user in their user profile.

Credit Card Integration: V8 includes full and seamless integration to Curbstone Corporation for Credit Card processing through XA_Card Connect.

Order Status: Order information and Advanced Search is now conveniently accessed from one central location.

Invoice Summary Page:

This new page offers a wealth of order information...search by:

- Purchase Order Number
- Invoice Number
- Order Number

Summary information includes:

- Invoice Date
- Due Date
- Invoice Number
- Invoice Amount
- P.O. Number
- Order Number

Drill down on a specific invoice to view invoice header information; we've also added Trade Discount for review. Drill down on the Order Number to review order information...additionally drill down on the Shipment Number to review order items, item descriptions and quantity ordered. From Shipment Details, easily circle back to Invoice header information for a full view of the transaction.

Shipment Summary Page: With the same degree of information accessibility, the Shipment Page conveniently displays the shipment tracking number to seamlessly link you to carrier and tracking information. Search by:

- Purchase Order Number
- Invoice Number
- Order Number

Additionally, shipments are displayed by line and include critical information such as:

- Shipment Date
- Shipment Time
- Shipment Number (again drill down for shipment detail!)
- Tracking Number (drill down here too!)
- PO Number
- PO Date
- Shipment Status
- Invoice Number (drill down!)
- Order Number (one more time, drill on down!)

Enhanced Shipment Status Detail: Shipped - ready to invoice, as well as Shipped - invoice printed. Additionally, Invoice number is added to Shipment Detail.

Advanced Catalog:

Catalog Shop now extends usage to include more extensive catalog search options with COM_Net2 Suggest. Additionally a drop down menu of catalog categories makes getting where you know you want to go, that much easier!

- New Catalog Navigation
- COM_Net2 Suggest
- Ability to switch catalogs in “Customer Defaults”
- New Top Level Item Drill Down

TECHNICAL UPDATES

AJAX

AJAX (Asynchronous JavaScript and XML) the basis of COM_Net2 Suggest, sends each keystroke to XA and returns a result without refreshing the entire web page. It’s phenomenally fast and way cool! It can be enabled or disabled either globally or by the user in their session.

Multiple Instances

Multiple Instances allows customers to have multiple COM_Net2 instances on the same server. Each instance has its own code-base, XSL set, and service. This will simplify the upgrade to V8 by allowing V8 to co-reside on the same server as a previous version.

Maintenance Updates:

- COM_Net2 functionality includes a Catalog Import feature but revved up V8 allows you to easily import New Users as well!
- Enhanced Export functionality: Users and Catalog information may be exported with ease!

Architecture:

- New base skin layout!
- New “Skin Morph” dramatically increases flexibility:
 - Color and font changes in seconds!
 - Globally applies to all sheets within the skin!
